Memo to File:

RE: Texas Gulf Operations  
Cane Creek Mine  
ACT/019/005  
Grand & San Juan Counties

A meeting was held on February 10, 1984 with Rudy Higgins (General Manager) and Clark H. Huff (Manager of Technical Operations) of Texas Gulf Chemicals Company. Pamela Grubaugh-Littig, Jim Smith and Tom Munson represented the Division.

The company presented their concern that they would like to receive a permit for an approved Mining and Reclamation Plan (MRP) in order to make long range forecasts for the operation. There are two major management decisions that will be made for the operation for the future: (1) if they will possibly expand the operation and sink two shafts; and (2) if not, what type of dollars are they looking at in reclamation.

A pre-design conference will be scheduled for the first part of March. A MR-1 form was given to the operator to complete. A previous mine and reclamation plan was submitted to the Division April 1, 1977.

Pamela Grubaugh-Littig  
Reclamation Engineer
